Modular structure & scalability

PayG has redefined the system of white label payment processing solution with modules, each being able to work independently. Seamlessly you can use our solution combined with your reporting system. Or you can use our manageable modules combined with your payment gateway. At the end you pay only for the modules you actually need.

Our white label payment solution is able to adapt quickly under any condition: to facilitate new payment means integration, to add reporting forms or service modules for online merchants across any industry or segment.

- ✓ No investment required for cumbersome hardware
- ✓ Highly secured transactions with no room for fraud or hacking
- ✓ Fast, secure and simple.
- ✓ Instant credit to your bank account
- ✓ No extra charges

Customization & branding

You can choose the style, UI, name and domain for your processing system. We can seamlessly add the acquiring bank of your choice you would like to work with into the system upon request. Our end to end white label payment solution easily incorporates your design and style. Pay-G has the expertise, skills and Industry knowledge to provide your organization with its own branded payment gateway.
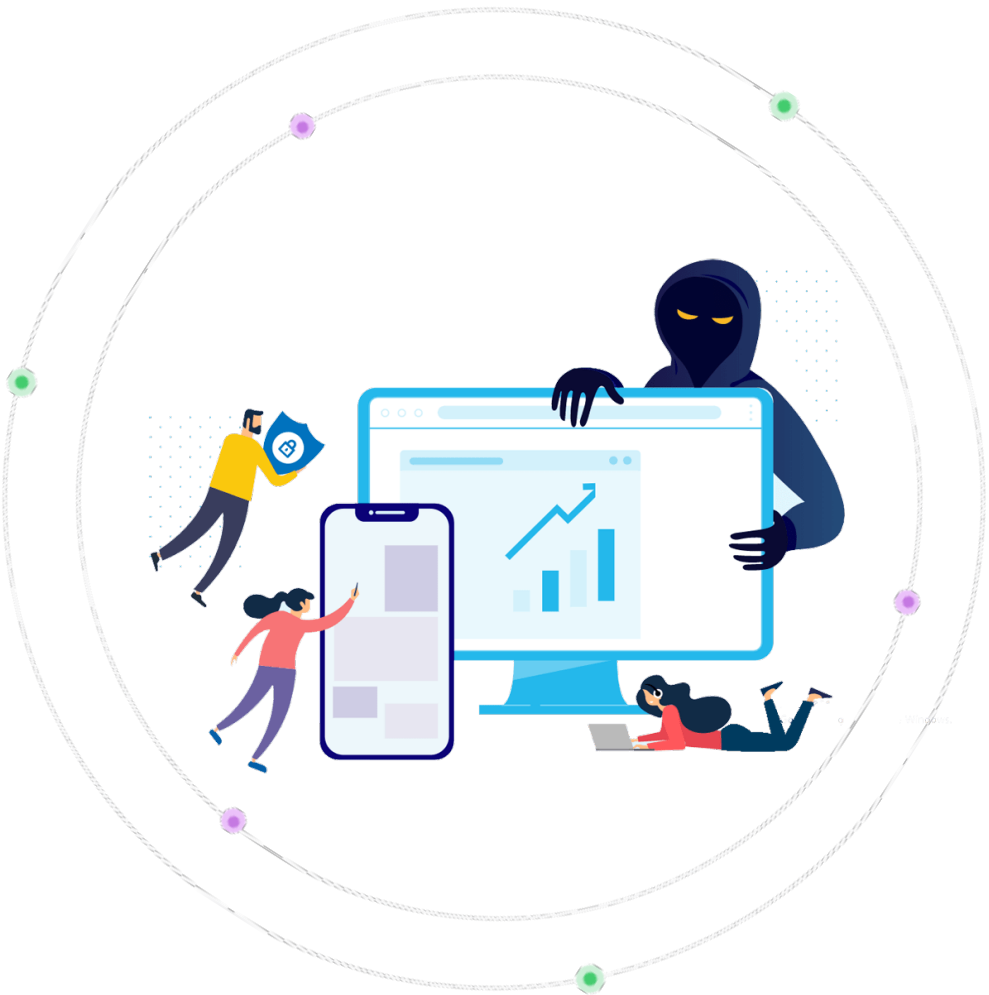

Analytics & Reporting

You can get comprehensive analytical reports with customizable requirement for any time period. Financial reports with accurately calculated amounts for merchant payouts are auto generated on daily basis. Payouts and other transactions are captured meticulously.

Anti-fraud tools

The system always ensures that you and your clients are protected from chargebacks on your white label payment gateway. Best anti-fraud modules for your choice:

✓ 3-D secure support module, the official VISA and MasterCard protocol for card holder authentication

✓ PayG safety module is developed in-house and allows to compile and manage "black" and "white" lists of buyers, set the limits for payments, track and identify each devices via which the payment was made, track buyers activity & statistics, create safety rules and parameters for identifying fraudulent transactions and report fraud immediately
